

SWEEPVAC AUSTRALIA

**EXCLUSIVE TO
SWEEPVAC AUSTRALIA!**

Introducing the all new Tempest Leaf Blower from Stocks Sweepers. The unique Tempest Leaf Blower will offer massive savings in landfill tipping charges, fuel costs and needless driver's wages for non-productive operating hours.

Introducing *Tempest*, our simple yet effective solution for removing leaf litter from the road surface. Utilising an air stream that is fully adjustable from within the cab for both power and direction, organic matter is simply blown into the verge, where it can mulch down naturally. Of course, any heavier litter will be swept up by the conventional brushes a few seconds later. Picking up less waste means fewer trips to landfill, lower tipping charges, vastly reduced fuel and wages costs, less wear and tear on the vehicle and, of course, the roads. And best of all, *Tempest* 'recycles' waste air that would normally be vented to the atmosphere.

HAND BLOWER ATTACHMENT

And where leaves can't be blown into the verge, the handheld blower attachment enables the operator to blow them into the road where they can be swept up conventionally, with no risk of HAVS (hand arm vibration syndrome).

KEY FEATURES

- ❧ Blows leaves off footpaths in one pass whilst sweeping the road, keeping footpaths safer
- ❧ Reduces your carbon footprint
- ❧ No non-productive off-site time
- ❧ Massive fuel savings by eliminating needless journeys to landfill site
- ❧ Helps reduce the risk of flooding by removing leaves from drain covers
- ❧ Can be retro-fitted to other manufacturers sweepers
- ❧ No risk of HAVS (hand arm vibration syndrome) from using the hand-held blower

To see the amazing results that Tempest can achieve, visit www.sweepvac.com.au, search for 'Stocks Tempest' on YouTube or scan this QR code with your mobile →

SweepVac Australia is a leading distributor of heavy-duty, truck-mounted suction road sweepers.

Our Road Sweepers are designed and manufactured to give years of reliable service, as well as great value for money.

The Stocks Sweeper can be fitted with a wide range of interesting and innovative features; for example the exclusive *Tempest* Leaf Blower (Patent No. GB 2477605), reversing alarms and sensors, overhead suction boom, high-pressure washing system, adjustable side brush positioning, full auto lubrication system,

cameras and beacons, all of which can be specified and installed on your new sweeper. We also hold an extensive range of genuine replacement parts for our sweepers and an extremely comprehensive range of replacement parts to repair and maintain other manufacturers machines.
